

THE BISTROT

The Bistrot, a fabulously buzzing metro-meets-retro hub of good taste and creative culinary keeps things moving along with the welcome of Chef Frazer Wood. With his vast experience of travel across the globe, most recently cooking up a storm in London and Australia, Frazer is looking forward to continuing the success of The Bistrot, and working with the excellent Bistrot team.

Discreetly situated on Seminyak's 'Eat Street' this restaurant and bar has been conceptualized and lovingly put together by the formidable team of Zohra and Blaise. An impressive wooden air-conditioned, yet high-ceilinged open space, upon entering you immediately feel welcomed and reminded of a New York loft/factory space with a distinct industrial feel. However, the interior furnishings pay homage to the many antiques and artifacts sourced from around the Indonesian archipelago, most being from the couple's personal collection, and the upstairs bar provides a space that Hemingway would be proud of. Bistrot is original, fun, delicious and well worth a try.
